- 📍 Sudama Nagar, Indore (M.P.)
- 🌐 [nikhil-tikle-portforlio](#)

### PROFILE SUMMARY

Offering 8+ years of rich IT experience in Front-End Development & Delivery of user-friendly, customized, high-quality IT Products /Web Applications as per customer needs for enhanced user satisfaction and marketplace success.

### SKILLS

#### Functional Skills

- IT Architecture
- Digital Transformation
- Full Stack Development
- Service Delivery
- Business Analysis
- SDLC & UAT
- Product Management
- UI/UX Design
- Module Integration
- CRM
- Agile Scrum
- Product Launch
- Collaboration
- Troubleshooting
- Team Leadership

#### Technical & Domain Skills

- ReactJS
- HTML5/CSS3
- JavaScript
- Material UI
- REST APIs
- jQuery/Bootstrap
- Node.js
- NGINX/Linux
- Git/GitHub
- Credit Risk Systems
- GPS Tracking
- Talent Management

### WORK EXPERIENCE

#### Codescure Technologies Pvt Ltd

JUNE 2022 - PRESENT

##### Senior Frontend Developer

- Created responsive, scalable interfaces using Technology for seamless user experiences.
- Worked with product, design, and backend teams to deliver user-centric web applications.
- Implemented Redux and Context API to ensure efficient data flow and performance.
- Maintained high standards with code reviews, automated testing, and best practices for clean, scalable code.
- Guided and supported junior team members, enhancing overall team performance.

#### Webonex Technologies

2019 -2022

##### Frontend Developer

- Develops web applications using React library
- Focuses on the client-side implementation of web pages and interfaces
- Works with back-end developers to integrate the UI with data and server-side logic
- Writes clean and reusable code with a focus on performance and scalability
- Debugs and troubleshoots issues related to React components
- Implements state management solutions such as Redux

#### Tata Consultancy Services (TCS)

2017-2019

##### Softaware Engineer

- Develops web pages and interfaces using HTML, CSS, and JavaScript
- Collaborates with designers to implement designs and layouts
- Implements responsive design to ensure that the application looks good on all devices
- Implements accessibility features to ensure that the application is usable by everyone
- Ensures that the application is compatible with different browsers and platforms

### Digital Event Management Platform

- Developed a Digital Event Management Platform using React.js and popular libraries like React Router, Redux, and Material-UI.
- Implemented CRUD (Create, Read, Update, Delete) operations for event management, allowing users to create, edit, and delete events seamlessly.
- Integrated APIs for real-time data retrieval and storage, providing a seamless user experience and ensuring up-to-date event information.
- Utilized reusable components from popular React libraries such as React DatePicker, React Select, and React Modal, enhancing development efficiency and maintaining consistent UI patterns.
- Leveraged React Router for smooth navigation between different pages and dynamic routing based on event details.
- Implemented state management with Redux, ensuring efficient data flow and maintaining a single source of truth for event-related information.
- Utilized Material-UI library for building responsive and visually appealing UI components, enhancing the overall user experience.
- Implemented form validation using libraries like Formik and Yup, ensuring accurate and error-free event data submission.

### Application Tracking System

- Developed intuitive and visually appealing interfaces using modern web technologies.
- Implemented front-end functionality, including reusable components and client-side form validation.
- Ensured compatibility across different browsers and resolved compatibility issues.
- Analyzed and optimized the application's performance, including asset compression and lazy loading.
- Followed accessibility guidelines and implemented features for users with disabilities.
- Wrote clean, modular, and well-documented code following best practices and coding standards.
- Identified and resolved UI-related bugs and collaborated with the backend team for integration issues.
- Stayed updated with front-end development trends, shared knowledge, and mentored junior developers.
- Collaborated with UX designers and stakeholders, participated in agile processes, and communicated effectively.
- Conducted user research, gathered feedback, and implemented UI enhancements based on user needs.

### AI Chat Bot

- Designed and implemented user-friendly interfaces for the chatbot, focusing on visual clarity and ease of use.
- Developed core front-end features, including real-time message handling and interactive chat bubbles.
- Ensured the application worked seamlessly across major browsers and devices, resolving any inconsistencies.
- Improved loading speeds through techniques like minification and efficient asset management.
- Focused on accessibility by incorporating keyboard navigation and screen reader support for all users.
- Created modular code structures, enabling easier updates and scalability for future enhancements.
- Collaborated with the backend team to troubleshoot integration issues and refine data flow.
- Participated in code reviews and provided constructive feedback to enhance team coding practices.
- Engaged in continuous learning by exploring new libraries and frameworks, applying them where beneficial.
- Conducted A/B testing to gather user insights, making data-driven decisions for UI adjustments.
